【社会科学理論・方法論、統計学、社会学、社会学理論、社会調査】

社会統計学に大きな影響を与えた古典的及び最近の重要論文を収録した

社会統計学 全4巻
Social Statistics. 4 vols.

特別価格（2010年3月15日まで）hard set 定価 hard set

統計学と統計分析の利用は、現代の社会科学において重要な特徴になっています。社会統計学は、社会環境における人間行動を研究するための統計的測定システムの利用で、歴史的にはドイツ統計学派の統計学のことをいいます。19世紀から20世紀初頭に盛んであったが、その後ドイツ社会統計学派は衰退しました。社会統計学は、今日では「社会現象を数量的（統計的）に分析するための形式科学、つまり統計的社会調査（統計調査）によって得られたデータから有効な情報を引き出す手法の体系」と考えられています。（『新社会学辞典』有斐閣、1993年、649頁）

本書は、社会調査方法として統計学を利用することに関してしばしば起こる論争を形成した、古典的及び最近の論文を収録したレファレンス・コレクションです。第1巻「総計カテゴリカル・データの統計的分析」、第2巻「カテゴリカル・データの統計的モデリング」、第3巻「縦断的データ分析」、第4巻「順序データの統計的分析と多水準分析」から構成されています。

Volume 1: The Statistical Analysis Of Aggregate Categorical Data
1. W. Macdonell, On The Influence Of Previous Vaccination In Cases Of Smallpox, 1901
2. W. Palin Elderton, Tables For Testing The Goodness Of Fit Of Theory To Observation, 1902
3. N. Blanchard, On The Inheritance In Coat-Colour Of Thoroughbred Horses [Grandsire And Grandchildren], 1902
4. G. Yule, Notes On The Theory Of Association Of Attributes In Statistics, 1903
5. W. Macdonell, A Further Study Of Statistics Relating To Vaccination And Smallpox, 1903
6. K. Pearson Et Al, The Law Of Ancestral Heredity, 1903
7. G. Yule, On A Property Which Holds Good For All Groupings Of A Normal Distribution Of Frequency For Two Variables, With Applications To The Study Of Contingency-Tables For The Inheritance Of Unmeasured Qualities, 1906a
8. G. Yule, On The Influence Of Bias And Of Personal Equation In Statistics Of Ill-Defined Qualities: An Experimental Study, 1906b
9. K. Pearson, Reply To Certain Criticisms Of Mr G. U. Yule, 1907
10. K. Pearson, On A New Method Of Determining Correlation, When One Variable Is Given By Alternative And The Other By Multiple Categories, 1910
11. K. Pearson, On The General Theory Of Multiple Contingency With Special Reference To Partial Contingency, 1916
12. R. Fisher, On The Interpretation Of Χ2 From Contingency Tables, And The Calculation Of P, 1922
13. G. Yule, On The Application Of The Χ2 Method To Association And Contingency Tables, With Experimental Illustrations, 1922
15. H. Hotelling, Recent Improvements In Statistical Inference, 1931
16. F. Yates, Contingency Tables Involving Small Numbers And The Χ2 Test, 1934
17. M. Bartlett, Contingency Table Interactions, 1935
18. H. Norton, Calculation Of Chi-Square For Complex Contingency Tables, 1945
19. F. Yates, George Udny Yule, 1871-1951, 1952
20. S. Roy And M. Kastenbaum, On The Hypothesis Of No “Interaction” In A Multi-Way Contingency Table, 1956
22. M. Kastenbaum And D. Lamphiear, Calculation Of Chi-Square To Test The No Three-Factor Interaction Hypothesis, 1959
23. F. Yates, Tests Of Significance For 2 X 2 Contingency Tables, 1984

VOLUME 2: STATISTICAL MODELLING OF CATEGORICAL DATA
24. L. Goodman and W. Kruskal, Measures of Association for Cross Classifications, 1954
25. J. Darroch, Interactions in Multi-Factor Contingency Tables, 1962
28. L. Goodman, How to Ransack Mobility Tables and Other Kinds of Cross-Classification Tables, 1969
29. L. Goodman, A General Model for the Analysis of Surveys, 1972
31. R. Hauser, A Structural Model of the Mobility Table, 1978
32. O. Duncan, How Destination Depends on Origin in the Occupational Mobility Table, 1979
33. L. Goodman, Criteria for Determining whether Certain Categories in a Cross-Classification Table should be Combined, with Special Reference to Occupational Categories in an Occupational Mobility Table, 1981
37. Z. Gilula and S. Haberman, Canonical Analysis of Contingency Tables by Maximum Likelihood, 1986
41. C. Clogg, The Impact of Sociological Methodology on Statistical Methodology, 1992
42. T. Biblarz & A. Raftery, The Effects of Family Disruption on Social Mobility, 1993

VOLUME 3: THE ANALYSIS OF LONGITUDINAL DATA
43. T. Anderson and L. Goodman, Statistical Inference about Markov Chains, 1957
44. L. Goodman, Statistical Methods for the Mover-Stayer Model, 1961
45. R. McGinnis, A Stochastic Model of Social Mobility, 1968
46. A. Dempster et al, Maximum Likelihood from Incomplete Data via the EM algorithm, 1977
47. J. Heckman, Dummy Endogenous Variables in a Simultaneous Equation System, 1978
48. J. Heckman, Sample Selection Bias as a Specification Error, 1979
49. J. Heckman, Statistical Models for Discrete Panel Data, 1981a
51. R. Davies and R. Crouchley, Control for Omitted Variables in the Analysis of Panel and Other Longitudinal Data, 1985
53. C. Winship and R. Mare, Models for Sample Selection Bias, 1992
55. R. Little, Modelling the Drop-Out Mechanism in Repeated-Measures Studies, 1995
59. P. Albert, A Transitional Model for Longitudinal Binary Data Subject to Nonignorable Missing Data, 2000
60. J. Roy and X. Lin, Missing Covariates in Longitudinal Data with Informative Dropouts: Bias Analysis and Inference, 2005
61. J. Wooldridge, Simple Solutions to the Initial Conditions Problem in Dynamic, Nonlinear Panel Data Models with Unobserved Heterogeneity, 2005

VOLUME 4: THE STATISTICAL MODELLING OF ORDINAL DATA AND MULTI-LEVEL ANALYSIS
62. S. Fienberg and W. Mason, Identification and Estimation of Age-Period-Cohort Models in the Analysis of Discrete Archival Data, 1979
63. P. McCullagh, Regression Models for Ordinal Data [with Discussion], 1980
64. R. Mare, Social Background and School Continuation Decisions, 1980
65. A. Agresti, Measures of Nominal-Ordinal Association, 1981
66. R. Mare, Change and Stability in Educational Stratification, 1981
67. J. Anderson, Regression and Ordered Categorical Variables, 1984
70. R. Crouchley, A Random-Effects Model for Ordered Categorical Data, 1995
72. L. Sheiner, S. Beal, and A. Dunne, Analysis of Nonrandomly Censored Ordered Categorical Longitudinal Data from Analgesic Trials, 1997
73. P. Albert, S. Hunsberger, F. Biro, Modelling Repeated Measures with Monotonic Ordinal Responses and Misclassification, with Applications to Studying Maturation, 1997
74. E. Bradlow and A. Zaslavsky, A Hierarchical Latent Variable Model for Ordinal Data from a Customer Satisfaction Survey with “No Answer” Responses, 1999
75. D. Hedeker and R. Mermelstein, Analysis of longitudinal substance use outcomes using ordinal random-effects regression models, 2000
76. T. Ten Have, M. Miller, B. Reboussin, and M. James, Mixed effects logistic regression models for longitudinal ordinal functional response data with multiple-cause drop-out from the longitudinal study of aging, 2000
77. A. Agresti and R. Natarajan, Modeling Clustered Ordered Categorical Data: A Survey, 2001
78. A. Ekholm et al, Joint Regression and Association Modeling of Longitudinal Ordinal Data, 2003
79. A. Fielding and M. Yang, Generalized Linear Mixed Models for Ordered Responses in Complex Multilevel Structures: Effects Beneath the School or College in Education, 2005
82. S. Pudney, The Dynamics of Perception: Modelling Subjective Well Being in a Short Panel, 2008
